## Data notes

Wherever possible, the report shows fiscal data for the calendar year. Where data for the calendar year are not available, however, fiscal year data are used.

Two years separated by a dash (2001–02) indicate a range of calendar years, while two years separated by a slash (2001/02) indicate a fiscal year or, in the context of agriculture, an agricultural year.

Dollar figures are in current U.S. dollars unless otherwise specified. Billion means 1,000 million.
