Workshop on the Harmonization of Statistics in Southern Africa
Workshop on the Harmonization of Statistics in Southern Africa
Introduction

At the core of any development effort is the need for governments and other key stakeholders to measure and benchmark progress towards regionally and internationally agreed development goals such as the Millennium Development Goals (MDGs). There are standard development indicators and targets set and also comparison tools developed for countries and regions to track progress. All the measurement tools and indicators would be meaningless without appropriate and reliable statistical data and information. Across Africa many sub-regions and indeed countries lack the very basic source of statistical information flow that should have been available on annual basis as well as down to the lowest administrative level that is critical in tracking development targets and outcomes.

It is generally noted that many African countries particularly in the sub-region face increasing challenges in the generation, analysis, usage and dissemination of statistics thus impairing decision making processes. There is also the problem of lack of comparability and credibility among data sets due to different methodologies employed to collect data. In order to address some of these challenges at the continental level, the United Nations African Centre for Statistics was established. Its overall objective is to strengthen capacities for statistical development at national, sub regional and regional levels, including the promotion of the development of improved and integrated statistical databases in support of decision-making and policy formulation, monitoring and evaluation.

Through the African Centre for Statistics it is hoped that a community of practice which is well versed with generation, management and usage of statistics that can foster evidence-based policy-making will emerge. Despite these well-intentioned measures, a lot of data and statistical challenges abound in many countries and regions. It is against this background that the Economic Commission for Africa southern Africa office (ECA-SA) convened a regional workshop on the harmonization of statistics in Southern Africa.
Attendance

The Regional Workshop on the Harmonization of Statistics in Southern Africa was held at Tum’s George Hotel in Manzini, Swaziland from 3-4 December 2009. A selected number of experts from National Statistical Offices (NSOs) across the sub-region attended the meeting. Staff from the ECA-SA Secretariat as well as an official from the Southern African Regional Documentation Centre in Harare, Zimbabwe participated in the meetings. Names of participants and their institutional affiliation appear as Annex I.

Agenda item 1
Opening session and welcoming remarks

Mr. Alfred Latigo, Senior Economic Affairs Officer of ECA-SA warmly welcomed participants to the workshop and thanked them for favourably responding to the invitation to the meeting. He extended special appreciation to Ms. Nelsiwe Dlamini, a Statistician from the NSO in Swaziland for officiating at the meeting.

Agenda item 2
Objectives and Expected outcomes of the Meeting

Mr. Latigo outlined the objectives and expected outcomes of the Workshop. He stated that the overall objective of the Workshop was to forge a strategic partnership with NSOs to address capacity constraints in the generation, analysis and dissemination of statistical data across the sub-region. Arising from this partnership, it was envisaged that the ECA-SA would have timely access to useful, reliable and comparable statistical data from member States for its various publications.

The ECA official further stated that the expected outcomes of the meeting were to (i) propose a framework for collaboration between ECA-SA and NSOs for the development of statistical information systems at various levels; (ii) harmonize the generation, analysis and dissemination of statistics at the sub-regional level; and (iii) lay a foundation for building of a regional database. He informed the participants that the meeting’s recommendations would be synthesized into a draft report to form part of the background information for a similar meeting to be held in February 2010.
Overview of ECA and ECA-SA activities

Mr. Latigo started by giving a brief background of the ECA stating that the organization was a regional arm of the United Nations in Africa. He highlighted the special institutional collaboration existing among the ECA, AfDB and the AU within the context of realizing Africa’s development agenda. He further informed the meeting that the AU has a unique political mandate to coordinate the implementation of Africa’s development and regional integration while the AfDB and the ECA provide the financial and technical leverage to the continent’s development agenda.

Based on its mandate and the AU agenda, ECA focuses on activities where its competence, contributions and comparative advantage are widely acknowledged. ECA strives to achieve results in two related and mutually supportive pillars namely (i) Promoting regional integration (RI) in support of AU vision and priorities and (ii) helping Africa to meet its special needs and global challenges.

Mr. Latigo stated that the ECA has been supporting the process of RI as part of Africa’s strategy for economic transformation and for integration into the global economy. ECA’s special support to regional integration is further demonstrated by (a) its key role in the formulation of the Abuja treaty, NEPAD, establishment of the AfDB, COMESA, African Central Bank Association, and over 30 related institutions in Africa including recently the Centre for Studies on RI in Mozambique; (b) monitoring progress in integration-building capacities for implementing the Abuja Treaty for establishing the African Economic Community (AEC); (c) promoting NEPAD initiatives particularly in infrastructure development, sectoral issues, and peer learning.

At the sub-regional level, the ECA official informed the meeting that the sub-regional office in Lusaka, Zambia has been involved in the project to mainstream regional integration in national development plans. He stated that the overall aim of this project is to establish lasting institutional processes within government, from national to local levels, and within the wider stakeholder community, to bring about domestication of RI that is focused on the government bodies responsible for RI, and that strengthens the role of such bodies and non-governmental actors. He noted that the initial effort around the project was initiated in 2008 in Mozambique with the development of a framework for mainstreaming RI
in NDPs. The ECA has also been involved in supporting regional energy cooperation through a number of initiatives. For instance, the creation of power pools ranks high on the agenda of NEPAD and SADC.

The meeting was informed that the ECA sub-regional office in Zambia had been instrumental in reviving the Growth Triangle among Zambia, Malawi and Mozambique. The Growth Triangle is defined as international neighbouring areas where economic differences can be used to promote international trade and foreign direct investment. Its main emphasis is that cross-border micro-regions are not givens, but are constructed and reconstructed through social practice, political economy and by a variety of states, corporations and non-state actors.

The ECA is also involved in providing various forms of support to RECs and Member States. In Southern Africa, the framework to strengthen the special partnership and cooperation between the SADC secretariat and the ECA–SA has now been translated into a multi-year programme, which among others, seeks to explore institutional modalities for strengthening collaboration between ECA and SADC. This collaboration directly contributes to greater institutional operational synergy resulting from a more coherent and strategic engagement.

It is worth noting that the ECA conducts several studies and convenes consensus building meetings on a wide range of issues within the context of supporting regional integration. In addition, the ECA provides advisory services to Member States through capacity building, policy prescription, studies and publications, and hosting of special events and/or meetings.

**Agenda item 4**

**Key publications of the ECA and ECA-SA**

Mr. Latigo gave a detailed account of the main publications that were at the core of ECA’s analytic and policy work. He outlined some of the key publications as follows:

- The Economic Report for Africa (ERA)
- The African Regional Integration Assessment (ARIA)
- The African Governance Report (AGR)
Mr. Latigo and Mr. Jack Jones Zulu, the Social Affairs Officer presented to the participants a number of templates that the ECA-SA uses for its key publications. Using the templates the two presenters highlighted the important economic and social indicators that are critical in the production of these publications. Some of the notable indicators highlighted in the presentations were:

- Growth rate
- Inflation
- Exchange Rate
- Fiscal deficit
- Public Debt
- Current Account Balance
- Savings and Investments
- Trade and Finance in Southern Africa
- Education and training
- Health (access to health, infant and maternal mortality rates)
- HIV and AIDS
- Employment and labour
- Water and sanitation
Agenda items 6 and 7

Plenary Discussions 1

In the ensuing discussions participants expressed happiness over the work of the ECA-SA particularly the wide range of publications that it produces. However, they were surprised that most of the key publications were never sent to them despite their strategic role as disseminators of information. An appeal was made to ECA-SA to carry out sensitization programmes and/or advocacy of its activities for national statistical offices and other stakeholders in general. Through sensitization ECA-SA will create more awareness about its presence and the services it offers to a wide spectrum of stakeholders both at the national and sub-regional levels.

The participants noted that there were a lot of institutions that were involved in the production and dissemination of statistics resulting in duplication of effort. Although in some instances statistics were readily available, participants expressed concern at the disparities in data particularly those coming from international organizations including UN agencies. The meeting questioned the authenticity and credibility of statistics from international organizations given that most of them generated data using computer models that did not usually depict reality in the Member States.

Thus the participants reiterated the SADC position on the need to use statistics from the primary source i.e., the national central statistical offices to avoid sending wrong signals to policymakers and other end users.

The participants all agreed on the need for them to forge closer ties in terms of information sharing and encouraging peer learning among themselves to promote best practices in the statistics sector.
Realizing that some national statistical offices face capacity constraints in terms of producing statistics to meet various needs, it was strongly felt that ECA should assist in addressing this institutional challenge.

**Agenda item 8**

**Establishment of the data base in Southern Africa**

The participants strongly endorsed the proposal to establish a regional database to be hosted by the SADC Secretariat. However, they cautioned that ECA-SA should first liaise with SADC to define the content of such a database and how it could be made to respond to the needs of various users in the sub-region. Once the modalities have been worked out for the proposed database then the ECA-SA should facilitate the setting up of the facility.

**Agenda item 9**

**Developing a joint Framework for collaboration**

A proposal was put forward on the need for ECA-SA and the NSOs to creatively think of establishing an institutional framework for collaboration. This proposal was briefly debated under the ensuing plenary discussions.

**Agenda item 10**

**Plenary Discussions 2**

The meeting unanimously adopted the proposal for the establishment of a framework of institutional collaboration between the ECA-SA and the NSOs. A suggestion was made that the starting point would be for the ECA-SA to write to all heads of NSOs clearly stating what the objectives of the proposed framework would be and also explaining what each party is expected to do, when and where. It was felt that the next meeting of ECA-SA and NSOs scheduled tentatively for February 2010 should be able to throw more light on the structure of the proposed framework.
Agenda item 11
Presentation of Recommendations

After the plenary discussions, a number of critical recommendations were generated and presented to the participants for further discussions. Below are the major recommendations that emerged from the meeting:

• As a matter of priority, all NSOs in the sub-region should endeavor to harmonize their data and statistics to allow for comparability. Harmonization should also be undertaken at national level for various government agencies such as Ministries of Finance, Central Banks and NSOs

• ECA-SA should call for a meeting of data producing agencies (NSOs) and users such as the IMF, the World Bank, UN agencies, and others to improve on the user-producer dialogue

• All statistics should be obtained from the primary source i.e., NSOs to avoid data disparities and at the same time promote data credibility. Any projections or extrapolations of data on any country should be cleared by national authorities, i.e., the producing agencies (NSOs)

• ECA-SA should share with NSOs its key publications for validation of statistical information before sharing with the wider public

• NSOs should appoint focal points to interface with the ECA-SA for purposes of data collection and participation in the review of ECA-SA publications

• ECA-SA should deposit its publications in NSOs as they have libraries to accommodate such materials

• ECA-SA should harmonize and coordinate its statistical and other related activities including sharing calendar of events with SADC Secretariat to avoid duplication of efforts

• ECA, AfDB, AUC, SADC and other partners should coordinate their advisory services and technical support to Member States to avoid duplication of efforts and ensure optimum use of resources

• ECA-SA should carry out sensitization programmes through meetings and workshops and other publicity channels on its major
publications for NSOs and other stakeholders

- In all future Inter-governmental Committee of Experts (ICE)’s meetings and other important ECA events, NSOs should be represented
- ECA-SA should assist in building requisite capacities of NSOs to enable them to compute various indices for national and international publications as well as the production of disaggregated data
- Before embarking on data collection missions, ECA-SA should share its templates for various data needs with NSOs for their input

**Agenda item 12**

**Follow up actions and Way Forward**

The immediate follow up action from the ECA-SA would be to circulate the meeting’s draft report to all participants for their information. More importantly, the ECA-SA was urged to refine the recommendations and send them over to heads of NSOs and the SADC Secretariat for their consideration.

**Agenda item 13**

**Evaluation and Closing Remarks**

Mr. Latigo thanked all the participants for their hard work and commitment during the two-day intense discussions. He paid special thanks to the Government of the Royal Kingdom of Swaziland through the NSO for co-hosting the meeting with ECA-SA. He informed the meeting that the recommendations that had been generated would go a long way in assisting the ECA-SA to re-strategise and optimize its data collection exercise. Mr. Latigo noted that the meeting had availed the ECA-SA an excellent opportunity to get closer to the NSOs in the sub-region and thus helped to cement institutional ties with them. Finally, he wished the participants a safe passage to their respective countries.

In a vote of thanks Ms Nelsiwe Dlamini from the Swaziland national statistical office thanked the ECA-SA for holding the meeting in Swaziland. She also thanked the participants for coming to the Kingdom
of Swaziland and hoped that they had enjoyed their stay. She ended by challenging policy makers in the sub-region to anchor their decision-making processes on the use of credible statistics especially those obtained from the NSOs.
Annexure I:

List of Participants

Mr. Peter Mukuka, Deputy Director, Central Statistical Office, P.O. Box 31908, Lusaka, Zambia, Tel: +260 211 254908, Telefax: +260 211 253609 Email: pmmukuka@zamstats.gov.zm or info@zamstats.gov.zm

Mr. Sylvester Kabuku Mbangu, Director (Deputy-Government Statistician), Central Bureau of Statistics/Bag 13356, Windhoek, NAMIBIA, Tel: +264 61 2834000, Fax: +264 61 287260 Email: smbangu@npc.gov.na

Ms. Lydia Maseatile Mothibeli, Senior Statistician, Bureau of Statistics, P.O. Box 445, Maseru 100, LESOTHO, Tel: +266 594 24884, Fax: +266 22 310177 Email: m.mothibeli@bos.gov or maseetsa@yahoo.com

Mr. Forbes Chinyemba, Documentalist, SARDC, 15 Pownie Ave, Belgravia, Harare, Zimbabwe, Tel: +263 4 79114, Fax: +263 4 791257 Email: fchinyemba@sardc.net

Mr. Nelson Taruvinga, Assistant Director, Central Statistical Office, P.O. Box CY341, Causeway, Harare, Zimbabwe, Tel: +263 4 706681, Fax: +263 4 728529 Email: ntaruvinga@cso.zarnet.ac.zw or netaruvinga@yahoo.com

Ms. Nelsiwe Dlamini, Statistician, Mbabane, Swaziland, Tel: +268 404 2151, Fax: +268 404 3300 Email: dlamini.nelly@yahoo.com
ECA Secretariat

Mr. Alfred Latigo, Senior Economic Affairs Officer, United Nations Economic Commission for Africa (UNECA), P.O. Box 30647, Lusaka, Zambia. Telephone No.: 260 211 228502-5, Fax No.: 260 211 236949. E-mail: alatigo@uneca.org

Jack Jones Zulu, Social Affairs Officer, United Nations Economic Commission for Africa (UNECA), P.O. Box 30647, Lusaka, Zambia. Telephone No.: 260 211 228502-5, Fax No.: 260 211 236949. E-mail:jzulu@uneca.org

Ms. Anne Temba Temba, Team Assistant, United Nations Economic Commission for Africa (UNECA), P.O. Box 30647, Lusaka, Zambia. Telephone No.: 260 211 228502-5, Fax No.: 260 211 236949. E-mail: atembate@uneca.org
Workshop on the Harmonization of Statistics in Southern Africa
