REPUBLIC OF MOZAMBIQUE

MOZAMBIQUE PRESENTATION

Harare - October 25, 2019
1. Topic 1: CIS Capacity

2. Topic 2: Institutional challenges in DRR;
(i) **Gaps in generating of CIS**

- Lack of hydro-meteorological stations along the main river banks;
- Lack of forecasting capacities at Meteorology and Hydrology Sector;
(ii) Gaps in provision of CIS

- Communication Absence of Evacuation Plan for specific vulnerable regions (Settlement areas flooded)
- Timely access to DRR Funds both national and international
- Timely access to financial resources & Limited fund allocation
- Limited resources and limited understanding of the roles and responsibilities in terms of operations and the information flux;
- Lack of access to funds to support the overall response;
- Meteorological information is not impact based, as a result it is not understood by the population;
(iii) Gaps in capacitating users in application of CIS

- Limited equipment and recourses to support the creation of more LCDRM (local communities) in most of the floods prone communities.
- The relief operations were often built on insufficient information which resulted in some areas not covered by the humanitarian assistance;
- Some partners mobilized staff without government coordination
- National focal points with limited understanding of the coordination mechanism
- Limited resources and limited understanding of the roles and responsibilities in terms of operations and the information flux
ROADMAP FOR CIS – TOTAL COST - USD 15.5 M

Meteorological Services – Need ---------------USD 6.5 M
Current -----------USD 3.2 M
Gaps ---------------USD 3.3 M – 50.1%

Environment and CC Services - Need --------USD 9 M
Current -----------USD 22.25 M
Super avitt ----USD 13.25 M -100%

</table>
✓ Establishment of an integrated national Multi-hazard (flood, cyclone, heat Health, storm surge etc) with detailed SOP in line with the DRR Master Plan 2017-2030.

✓ Definition and implementation of a short-term policy reform strategy, in order to better improve technical and operational capacities that require political decision making, including regulations and standards for operation procedures for public, private and civil society organization located in high flood and cyclone exposed areas.

✓ Strengthen Coordination.
For a Rapid, resilient and comprehensive reconstruction

Thank You
