

GREEN ECONOMY ORIENTED PROGRAMS.

In the Central African sub-region, there are already programs that are consistent with green economy objectives... The countries of the sub-region subscribed to the initiative code-named Central African Green Economy Development Support Program (PADEVAC) during the Green Business summit in Pointe-Noire from 8-10 May 2012... Biodiversity conservation is possible once many bilateral and multilateral cooperation initiatives on forest ecosystems conservation gain growing regional and international recognition. The REDD (Reduction of emissions from forest degradation and deforestation) and CDM (Clean Development Mechanism) programs are considered as pioneering.
